

AgStudio 2015 Service Pack 1 Hot Fix 1

Release Notes August 25, 2015

This update provides a VRA Exporter enhancement and several bug fixes.

VRA Exporter

- 🔗 The VRA Exporter now caches the export settings into the local user folder on each computer thus allowing organizations to use multiple computers as needed.
- 🔗 Reinitiated support for the Ag Leader TGT format which is the file format required for Ag Leader PF3000 monitors and New Leader DP6 monitors.

Bug Fixes

- 🔗 Fixed a bug in linking product mixes.

Field Operations

- 🔗 In the FieldOps Resource Linker, when assigning seed products in bulk, you can now use the manual link command on the quick link dialog without getting an error.

Reports

- 🔗 Fixed a bug that caused an object reference error in some manual field ops reports.
- 🔗 Fixed a bug in the Product Plan Summary report.
